Subject: RE: Composting Material with Pesticides

Hi Hillary – I just wanted to reach back and let you know this is still on my radar. I have reached back to HQ and they are trying to run down the appropriate expertise – could take another day or two.

Subject: Composting Material with Pesticides

Good Afternoon Jamie,

I noticed on the Pesticide Environmental Stewardship website, regarding disposal options for treated seeds, it says that treated seed should never be composted. I am assuming this may also apply to byproduct materials containing high concentrations of pesticides. Do you have any insight as to where this statement came from and the concerns with composting treated seeds? I assume there may be challenges associated with composting treated seed or other highly-contaminated materials, but I wanted to reach out to you and see if you have any insight on this. Thank you in advance!

Best,

Hillary Stoll
